

CxEnergy 2016 Final Technical Program Announced

For Immediate Release

Contact: Ed Armstrong (202) 737-7775, ed@commissioning.org

(Washington, D.C. March 7, 2016)—The #1 commissioning and energy management event of the year - [CxEnergy Conference & Expo](#) - provides more topical, in-depth educational sessions than ever for commissioning and energy management professionals. With nearly 300 attendees already registered for the April 11-13 event in Dallas, *CxEnergy 2016* anticipates a record-high attendance, and even greater participation from industry organizations and professionals than last year's highly successful event.

CxEnergy announced the final lineup for the technical program today. The 42 speakers represent top manufacturing, engineering and technology companies delivering presentations on the hottest topics in the industry. All technical sessions have been approved by the American Institute of Architects for continuing education units.

"*CxEnergy* is an excellent forum for exchanging ideas and exploring important issues," said Rheem Hybrid Applications Engineer Shaun Thomas. "Rheem's presentation on analyzing hot water use in high-volume facilities provides insights on the critical relationship of water use and energy consumption. It's an example of *CxEnergy's* commissioning/energy management-oriented programming that you just won't find anywhere else."

Sessions include topics such as commissioning case studies in education, health care and commercial settings; datacenters; controls and automation; building envelope; hot water systems; energy storage; LED lighting; data analytics; the IoT; test & balance; finance; and updates on ANSI & ASHRAE standards.

The speakers represent companies and organizations including Siemens, ENERGY STAR®, Google, Jacobs Engineering, Sebesta, Rheem, Schneider Electric, Trane and more. [Visit this page](#) for the full *CxEnergy* program. Registration is available at www.cxenergy.com, and the 10% discount is extended until March 18 with promo code "SAVE10."

CxEnergy's sold-out Expo Hall has over 40 companies that offer commissioning and TAB software, controls, test equipment, metering devices, and consultative services in engineering and enterprise energy management.

CxEnergy offers pre- and post-conference certification workshops and seminars for [Certified Commissioning Authority \(CxA\)](#) and [Energy Management Professional \(EMP\)](#). The event also features multiple networking events, receptions and luncheons.

CxEnergy is presented by the AABC Commissioning Group ([ACG](#)), Associated Air Balance Council ([AABC](#)), and Energy Management Association ([EMA](#)). Supporting organizations include the Texas Chapter of the United States Green Building Council, Dallas 2030, South-central Partnership for Energy Efficiency as a Resource, The Continental Automated Buildings Association, The Business Council for Sustainable Energy and The Institute for Market Transformation.
