

Save Time, Save Money

Commissioning practices can be optimized using CxAlloy’s proven technology so you can spend more time with clients, and less time managing spreadsheets. Complete checklist and tests, respond to issues, and record field reports digitally. No more double work.

Take Everything With You

Capture real-time updates when and where the work is completed in our mobile app. No internet connection? No problem. Work offline and sync when you get back online.

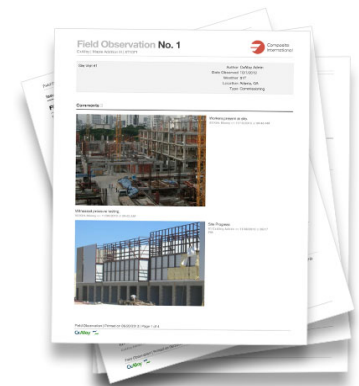

Seamlessly Communicate and Move Projects Forward

Real-time status visibility and automatic notifications keep everyone on the same page. Everyone is empowered to make informed decisions without delays due to unavailable information.

Customizeable and Time-Saving Reporting

Robust filtering and sorting capabilities allow you to quickly build any report you need. Final report creation can be reduced by as much as 80% using our tools.

Final Reports
in **LESS THAN**
15 minutes

Get In. Get Done. Get Home.

Highly Customizable

Not every project is the same. Create custom workflows, templates, priorities, and much more. All projects start from your defined defaults, but each project can also be configured independently. You have the control.

Your Data, Accessible Anywhere

Work offline and sync later. Document work as you are doing it. Complete checklists and tests, add and manage issues, write up field reports and add photos, all without an internet connection. Next time you're connected, everything will be synced automatically.

Pull real-time data from CxAlloy using our API

Pull your project data into enterprise dashboards, integrate with other software, analyze and archive data, or do something we haven't even thought of yet.

Free Training

Free monthly training sessions are open to all users. Plus, up to 4 hours of one-on-one training is included with every CxAlloy account.

Field Observations Completed in the Field

Type up field observations digitally and attach photos. Get the full value out of your work with digital data. Link, export, and report easily on the data you gather in the field.

Tailored Reports

Enhanced filtering and sorting capabilities allow you to build the reports you need with ease. Embedded documents, internal links, and automatically generated bookmarks mean you'll look like you have a full-time administrative staff without needing one.

Scan labels and record nameplate data with a tap

Now it's easy to capture accurate label information. No typing needed. Simply take a photo of equipment labels with your iPhone or iPad camera, then tap the recognized text to record instant, accurate data.

Custom Branding

Upload your logo to the header and footer in all reports and have your logo appear on the site so users see your logo instead of ours.

Complete Checklists and Tests Where You Work

Checklist and tests are answered right in the application so updates are available immediately for the whole team. CxAlloy TQ is more reliable and powerful than manual spreadsheets.

View History and Manage Permissions

See complete history of an issue, checklist, test, or anything else in your project. Granular permission control empowers you to invite everyone to work together and each user only sees what they need without additional clutter.

Draw and place text on images and PDFs

Add circles, rectangles, arrows, text, and freeform drawings when viewing images and PDFs. Circles and rectangles automatically create thumbnail images as callouts that can be viewed and included in reports.

Easy Photo and File Upload

Take photos as you go and effortlessly attach photos and files to issues, field observations, checklists, tests, and more right from your device.
