(Washington, D.C. March 6, 2017)—CxEnergy, the only conference and expo dedicated exclusively to building commissioning and energy management, announced today that Hanson Professional Services, Inc. will be a Bronze Sponsor and an Exhibitor at the event.

Robert Knoedler, P.E., EMP, CxA, a vice president and principal of commissioning and energy-related services at Hanson, and Jim Magee, CxA, EMP, president and CEO of Facility Commissioning Group, will present “After Hours Cx — Lessons Learned from K-12 Schools,” which examines lessons learned from commissioning K-12 schools as well as the challenges presented by the owners, architectural and engineering teams and contractors.

Nate Boyd, EIT, CPMP, LEED AP®, a mechanical engineer and energy specialist at Hanson, and Jeff Daniels, FMA, CEM, CEA, LEED GA, Orlando International Airport’s director of maintenance, will present “Development of an Energy Roadmap for Orlando International Airport.” A large airport authority sought to develop an energy roadmap for its growing campus. Gathering the requisite information, establishing benchmarks and targets and performing condition assessments and audits were critical steps, along with collaborating to forecast demands, costs, budgets and goals. Because these were phased efforts, it was vital to establish the sequence and prioritize the steps. This presentation will examine the development of the roadmap and how it will be used and periodically re-evaluated. Both presentations are approved by the AIA for 1 LU/HSW.

**CxEnergy 2017** is being held April 24-27 at the Osceola Convention Center of the Omni Orlando Resort at ChampionsGate, FL. **[CxEnergy’s technical program](#)** will cover key topic areas including Building Envelope/Enclosure Commissioning, ASHRAE Energy Standards, Data Center, BAS Cyber-security, Energy Water Nexus, Energy Audits, Lighting Controls, and more. The program features many of the best-known industry experts across all building science disciplines. AIA Continuing Education Credits will be available for technical sessions.

The **[expo hall](#)** showcases a wide variety of products including controls, software, instruments, metering devices and services targeted specifically to commissioning, energy management, engineering and testing firms.

The event also features several networking events that connect commissioning providers, energy managers, MEP engineers, and HVAC testing professionals with manufacturers and energy services providers. Attendee registration and event information updates are available at [www.CxEnergy.com](http://www.CxEnergy.com).

CxEnergy is presented by the AABC Commissioning Group (**[ACG](#)**), Associated Air Balance Council (**[AABC](#)**), and Energy Management Association (**[EMA](#)**).
