

# Rheem Manufacturing is CxEnergy Gold Sponsor

*Also Exhibiting & Giving Presentation on Temperature & Humidity in Critical Zones*

**For Immediate Release**

**Contact: Ed Armstrong (202) 737-7775, [ed@commissioning.org](mailto:ed@commissioning.org)**

(Washington, D.C. February 16, 2017)—CxEnergy, the only conference and expo dedicated exclusively to building commissioning and energy management, announced today that [Rheem](#) will be a Gold Sponsor and an exhibitor at the event.

Additionally, commercial business unit manager Mark Ritz will present on the topic of “Maintaining Temperature & Humidity in Critical Zones.” The battle to maintain temperature and humidity within critical zones has given HVAC engineers “headaches” and caused havoc for years. This presentation discusses the points of difference between the standard designs of humidity and temperature control versus the “predictable indoor environment” humidity and temperature control. Learn how technology can provide a neutral air zone in the most sustainable and efficient manner while providing real world, third-party validated data.

Rheem will exhibit its award winning [Rheem H<sub>2</sub>AC System](#) that offers unprecedented energy savings for facilities with high sensible cooling loads and large hot water demands. The H<sub>2</sub>AC is a rooftop air-conditioning system that incorporates an engineered waste heat recovery system capable of providing preheated water, up to 125F, to a water heater. Ideal for the food service industry, the H<sub>2</sub>AC has the potential to reduce the energy consumption by as much as fifty percent in typical water heating systems, saving energy, as well as saving facility owners thousands of dollars over the life of the product.

[CxEnergy 2017](#) is being held April 24-27 at the Osceola Convention Center of the Omni Orlando Resort at ChampionsGate, FL. The expo hall showcases a wide variety of products including controls, software, instruments, metering devices and services targeted specifically to commissioning, energy management, engineering and testing firms. [CxEnergy’s technical program](#) will cover key topic areas including Building Envelope/Enclosure Commissioning, ASHRAE Energy Standards, Data Center, BAS Cyber-security, Energy Water Nexus, Energy Audits, Lighting Controls, and more. The program features many of the best-known industry experts across all building science disciplines. All technical sessions are approved by AIA under LU/HSW category.

The event also features several networking events that connect commissioning providers, energy managers, MEP engineers, and HVAC testing professionals with manufacturers and energy services providers. Attendee registration and event information updates are available at [www.CxEnergy.com](http://www.CxEnergy.com)

CxEnergy is presented by the AABC Commissioning Group ([ACG](#)), Associated Air Balance Council ([AABC](#)), and Energy Management Association ([EMA](#)).
